

Control of Substances Hazardous to Health (COSHH)

In just one day delegates can learn the basics of identifying, measuring and controlling exposure to harmful substances, thereby safeguarding themselves and their colleagues.

Who should attend?

All those with responsibility for using, handling, transporting and storing hazardous substances.

- An understanding of the ways in which substances can harm health
- The knowledge for definition of exposure limits
- The skills to conduct COSHH risk assessments
- A greater understanding of practical control measures and safe systems of work
- Forms of chemical and biological agents and classification of substances
- The role of COSHH
- Workplace exposure limits and other sources of information
- Control measures, surveys for health risk and environmental issues
